

Techstack

- Static HTML + PWA
- Hosted on Github Pages
- Designed for mobile phone or tablet

Basic Usage

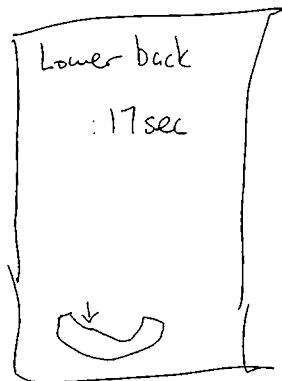

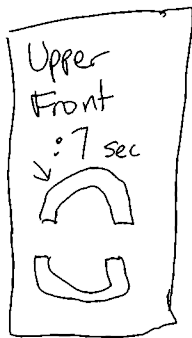

A user selects brushing session length with a default of 2 minutes. Then press start to begin timer

Once started the application tells
what segment to brush

- Upper front
- Upper back
- Upper top
- Lower front
- Lower back
- Lower front

with an illustration of teeth showing
segment and time remaining for section

The visualization is quite right

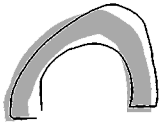

Upper front
